EDUCATION

University of Texas Rio Grande Valley,

Edinburg Texas — *Bachelor of Computer Science*

August 2023 - December 2025 GPA: 4.0

South Texas College, Weslaco Texas — *Associate of Science*

January 2020 - May 2023 GPA: 3.73

Relevant Coursework: Data Science, Database Design, AI Powered Applications, Data Structures & Algorithms, Linear Algebra, Operating Systems, Web Development

PROJECTS

Track and Field Data Analysis - Python & Data Science

GitHub: [<https://github.com/jorgebjr28/track-analysis>]

- Built a data analysis pipeline (Pandas, NumPy, Matplotlib, Seaborn) to clean, normalize, and visualize 3,000+ athlete performance records.
- Created co-occurrence and correlation heatmaps to reveal relationships between event participation and results.
- Applied K-means clustering and PCA to group athletes by specialization and presented actionable training insights.

Robot Sensor Database Project — SQL & Database Design

GitHub: [<https://github.com/jorgebjr28/robot-database-proj.git>]

- Designed and implemented a relational SQLite database for analyzing robot sensor data and time-interval events.
- Defined relational tables and foreign keys for Robot, TargetInterval, and SensorReading entities, and automated schema creation and CSV data imports using Python scripts.
- Developed SQL queries and Python-driven analyses to:
 - compute bounding boxes of robot movements per interval
 - analyze durations of robot proximity.
 - calculate average speeds on intervals and categorize movement behavior.

EXPERIENCE

Data Operations Specialist / Data Entry & Collection - January 2024 – May 2025

Employer: Robert Medrano | **Email:** stxfat@gmail.com | **Phone:** (956) 975-1477

- Collect, enter, and verify athlete performance data for track and field events using automated timing systems.
- Analyze meet results to generate performance reports, determine event winners, and identify statistical trends.
- Ensure accuracy and integrity of competition data through systematic quality checks and troubleshooting.
- Oversee video capture and data synchronization during live events to maintain precise timing and reliable results.

References available upon request.

SKILLS

Technical Skills: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R, C++, Java, JavaScript, Ruby on Rails

Data Skills: Data Cleaning, Visualization, Statistical Analysis, Machine Learning (Scikit-learn), Database Design

Other: Agile Development, Debugging, Troubleshooting, Typing Speed 85 WPM, Continuous Learner

AWARDS - ACHIEVEMENTS

Summa cum laude - Bachelor of Science in Computer Science, University of Texas Rio Grande Valley (December 2025)

President's List - All Semesters, UTRGV

LANGUAGES

English - Fluent

Spanish - Beginner

CERTIFICATIONS

Certified Entry - Level Python Programmer – 2023

Certified Entry - IT Specialist Java – 2023

Microsoft Office Specialist: Word Associate – 2022

ORGANIZATIONS

Society of Hispanic

Professional Engineers

(SHPE) - Member and 2-semester Mentor in the Mentor-Mentee program.

Data Structures and Algorithm's Architects

(DSAA) - Officer

(Parliamentarian), assisted with club operations and coding discussions.

Frontera Devs - Collaborate with peers to build real-world tech solutions for the Rio Grande Valley community.
